Vertical Mobile Cheat-Sheet for Final Review | Group 1

SLIDE 1: Team & Problem Statement

🕒 1 Min

🗣️ Speaker: Divesh Salve (Team Leader)

"Good morning respected Evaluators and Sir. I am **Divesh Salve**, Team Leader for Group 1. Our project is **Food Fusion – Next-Generation Online Food Delivery Website**.

Our team members are Pritesh Kanitkar, Rashmin Oak, Himanshu Medhe, and Swaraj Angre.

The **Problem Statement** we are addressing is: Existing food delivery websites like Zomato suffer from 3 major issues:

1. Ordering from 2 different restaurants forces users to pay double delivery fees.
2. Group dining with friends causes manual bill splitting friction.
3. Static websites lack gamified user rewards.

Now I invite Pritesh to explain Slide 2."

 **Speaker: Pritesh Kanitkar**

"Thank you Divesh. I am **Pritesh Kanitkar**. On Slide 2, I will explain our Proposed Solution & Process Flow Diagram.

Our solution Food Fusion introduces:

- 🍕 **Multi-Hotel Single Cart Engine**: Order from multiple restaurants in 1 cart with combined delivery discounts.
- 👥 **AI Group Order Room & QR Code**: Friends scan QR code (FF-ROOM-9821) to add dishes & auto-split bills.
- 🗣️ **AI Delivery Support Chatbot**: Floating AI assistant for instant order status & coupon help.
- 🎡 **Gamified 3D Fortune Wheel**: Spin wheel rewards with daily limits.

Looking at **Figure No 01 (Process Flow Diagram)**: The user flow moves from: **Select Dishes → AI Group Room QR → Auto Bill Splitter → Python Savings Math → Razorpay Payment → 3D Spin Reward → Live Map Tracking.**

Now Himanshu will explain Slide 3."

 **Speaker: Himanshu Medhe**

"Thank you Pritesh. I am **Himanshu Medhe**. On Slide 3, I will present our Tech Stack & Unique Selling Proposition (USP).

For our web application technologies:

-  **Frontend Web:** Built using **React 19, TypeScript, and TanStack Router**.
-  **Styling & Motion:** Custom **Tailwind CSS & Glassmorphism design system**.
-  **Backend REST API:** Powered by **Python 3.11 (server.py)** with **Nitro SSR Engine**.
-  **Database & Auth:** **Supabase DB SDK** with **local storage persistence**.
-  **Payments:** **Razorpay Sandbox Payment Portal**.

Comparing existing websites vs Food Fusion:

- **Existing Websites (Zomato/Swiggy):** Restricted to 1 hotel per order & manual bill splitting.
-  **Food Fusion USP:** Multi-Hotel single checkout, automated group bill splitting, AI Support Chatbot, and interactive 3D Spin Wheel.

Now Swaraj will explain Slide 4."

SLIDE 4: Key Unique Features

 1 Min

 Speaker: Swaraj Angre

"Thank you Himanshu. I am **Swaraj Angre**. On Slide 4, I will explain our **7 Key Unique Features & Innovations**:

1. 🍽️ **Multi-Hotel Single Cart Engine**: Combine dishes from multiple partner hotels in 1 single web checkout, saving ₹39+ per extra hotel.
2. 🗣️ **AI Delivery Support Chatbot**: Floating interactive AI assistant for real-time tracking & coupon help.
3. 👥 **AI Group Order Room & QR Code**: Scan QR (FF-ROOM-9821) to join room and view individual bill splits.
4. 🎡 **Gamified 3D Vector Fortune Wheel**: SVG spin wheel with sticker emojis & bonus spin credits.
5. 🔍 **Double-Click 300% HD Image Zoom Lightbox**: Full-screen 300% zoom controls for food photography.
6. 🌱 **Instant Pure Veg vs Non-Veg Mode**: One-click dietary website theme filter with green Pure Veg badging.
7. 🐍 **Python Full-Stack REST API Service**: Python backend script (`server.py`) calculating AI meal recommendations & savings math.

Now Himanshu will explain Slide 5."

SLIDE 5: Reference

 30 Sec

 Speaker: Himanshu Medhe

"Thank you Swaraj. On Slide 5, here are the References used:

- 💻 **GitHub Code Repository**: <https://github.com/diveshsalve21-design/online-food-ordering.git>
- 🐍 **Python REST API Framework**: FastAPI & Python 3.11 Documentation (fastapi.tiangolo.com)
- ⚙️ **React Framework**: React 19 Docs & TanStack Start SSR Engine (tanstack.com/start)
- 📖 **Database SDK**: Supabase JavaScript SDK Documentation (supabase.com/docs)
- 🎨 **UI Design System**: Tailwind CSS & Glassmorphism Specs (tailwindcss.com)

Now Swaraj will conclude with Slide 6."

SLIDE 6: Team Member Details

30 Sec

Speaker: Swaraj Angre

"Thank you Himanshu. On Slide 6, here are our Team Member Details:

- **Divesh Salve** (Team Leader) → Diploma | **Computer Engineering (CO)**
- **Pritesh Kanitkar** (Member 1) → Diploma | **Computer Engineering (CO)**
- **Rashmin Oak** (Member 2) → Diploma | **Computer Engineering (CO)**
- **Himanshu Medhe** (Member 3) → Diploma | **Computer Engineering (CO)**
- **Swaraj Angre** (Member 4) → Diploma | **Electronics & Telecommunication (EXTC)**

Thank you! We are now ready for our live website demo and code explanation."
